

# Teat-Kote® Plus

Iodine Pre & Post Milking  
Teat Dip from Concentrate

Teat-Kote Plus is an Iodine teat dip system that allows for adjustability in germicidal strength (0.25%, 0.50%, 0.75% and 1.0% Iodine) and flexibility in skin conditioning levels (0.5%, 2%, 5%, 10% and 15%) to accommodate changes in weather, udder health status, and herd environment throughout the year. Teat-Kote Plus is a highly effective product for dip, spray, or foaming teat dip applications.

## FEATURES AND BENEFITS

### Versatile product blending

Create a customized teat dip package by selecting from 0.25%, 0.5%, 0.75%, or 1% Iodine, and combining with a skin conditioning package that can range from 0.5-15%. With the flexibility to make changes when required throughout the year, based on soil load in the herd environment or weather patterns, dairy producers can optimize costs while best supporting teat and udder health.

### On-farm concentrate blending

Benefit from producing fresh teat dip product as needed, oftentimes utilizing a smaller footprint with less required storage.

### Superior skin conditioning

Easily tailor the percentage of skin conditioners in your teat dip based on teat condition appearance or season utilizing either GEA's System III or System V skin conditioning packages.

**System III:** Glycerin with additional Aloe and Vitamin E

**System V:** Lanolin, Propylene glycol, Glycerin, Allantoin, and Aloe

Both formulations are designed to promote a natural moisture balance that keeps teats healthy, soft, and pliable.

### Effective killing power of Iodine

Designed to deliver effective environmental and contagious mastitis protection in both pre and post teat dipping applications with the tried and true "gold standard" sanitizing capabilities of Iodine.

### Controlled pH

Provides superior antimicrobial activity without irritation to cows' teats.

### Dark brown color

Good staining qualities to provide visual confirmation that teats have been dipped or sprayed properly.

### 100% customer satisfaction

All GEA hygiene products have a 100% customer satisfaction guarantee.

## Iodine Pre & Post Milking Teat Dip from Concentrate

### DIRECTIONS FOR USE

Use only when properly blended. Teat-Kote Plus is made by blending Teat-Kote Concentrate with potable water. Additional emollient may be included using System III or System V conditioning package. Always prepare in a well-ventilated area. Precise and accurate blending is made possible with the use of an automated blending system recommended by your local GEA dealer or GEA Hygiene Sales Specialist.

### RESEARCH

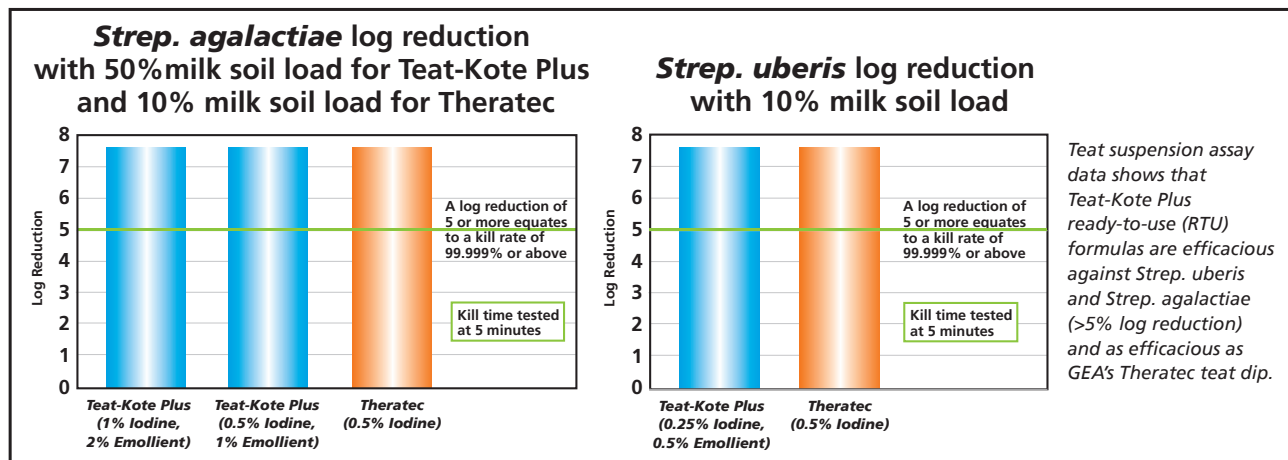

### PRODUCT PROPERTIES\*

- Appearance:** Dark red-brown liquid
- Odor:** Iodine
- pH:** 4.0-7.0 (based on selected iodine concentration)
- Specific gravity at 77°F (25°C):** 1.0-1.1 based on emollient level (water = 1)
- Wetting ability:** Excellent

\*When properly mixed as directed on label instructions
